Washington, DC 20554

Commissioner Abernathy:

I think it would be extremely beneficial for our nation if violence were more regulated (and limited) on television. Watching violence desensitizes Americans (especially impressionable children) to it.

I believe it's like rape: almost all imprisoned rapists say they started with soft porn, moved to hardcore porn...and then made it real(rape). We show American children "soft violence" (and sometimes more) and then expect that they are not going to try to make it real/try it out/think about it or plan a violent act...it's just nonsensical.

It is like the old saying: "garbage in, garbage out." Whatever we put in our minds will come out. At first most can resist urges to do anything violent, but soon we become so desensitized to it that we don't think it's wrong, we justify it, and take part in it.

Thank you for all you do.

Sincerely,

Jamie Powers

I believe research proves a direct correlation between aggressive behavior in children and violence seen on TV.

As the Superintendent of a Christian School in Central PA, a grandmother of six, and a follower of Jesus Christ I appeal to governmental leaders to save our children and all of us from the violence presently portrayed on this nation's television viewing.

Sincerely,

R. Ann Kanagy
717-667-6600

Commissioner Abernathy:

I'm contacting you today as a mother of three children, ages 3 to 9 years old. I work very hard to limit my children to a select few programs on PBS, Nickelodian, or the Disney channel. But as they grow that becomes more difficult and I really worry about the images they may see in the coming years. As an American, it should be my right to turn on the TV without seeing extreme violence and gore. My children should have the right to grow up without those destructive images assailing them daily. Please do what you can to limit violence on Television today.

Sincerely,

Christina Chronister

Commissioner Abernathy:

Children and adults are affected by violence on TV. How can you not be? Life is about exposure. It is getting frustrating to watch a show only to find out that the violence reaches far beyond what I should expect from my regular, non-cabled, stations. There have been TV dramas that I have been shaken by and I am 41 years old. Is life that sick as portrayed? Why open up the thoughts to children and adults for things that even allow the mind to reflect on it. We tell children to read. They are affected by reading. Children and adults are both. Why can't we make the connection about the continual violence and creudity on TV? You are what you eat! You are what you see and read and put in your mind.

Sincerely,

Sharon Carter

Commissioner Abernathy:

Road rage, Columbine, fired employees returning to their work place and killing they're ex-bosses, people killing people just for the thrill - we are becoming a violent nation. People are becoming desensitized to the horrors of performing such violent acts, in part due to the violence we are exposed to on tv, movies, video games, etc. Desensitizing people to the horror of killing someone is a tactic that has been used by the military for years and it has proven quite effective. Several studies have also shown that exposure to violence creates violence. It's time that something was done to stop this trend and you can do your part by limiting the amount of violence on TV. I thank you for your concern about the people of this nation.

Sincerely,

Patricia W. Craig
